

👋 HEY THERE

Hi, I'm Aman. I'm a *Product Designer*, who can code. I love building things. My past projects include SMPLKit and Dopamine Biscuit.

Currently working at *Houndstooth SC* in the beautiful city of Mumbai.

Experience

HOUNDSTOOTH SC

July 18 — Present
UI / UX Designer

At Houndstooth, I have worked with multiple international clients including Voyage, Megaexams and FLO.

In the past 2 years, I have helped FLO built a optimized ecommerce experience, Voyage with a web app for SMS marketing and Megaexams with revolutionizing how students take examinations in India, among a few.

BILLEASY

July 17 — July 18
UI / UX Designer

At Billeasy, I was responsible for 2 web apps, 1 multi-platform mobile app and our website.

I helped Billeasy create an awe-inspiring website, shifted from cringy fonts to note-worthy ones, and defined an overall design language for a cohesive experience.

SMPLKIT

Jan 20 — Present
Creator

Last year I started working on an icon library that worked like magic. You type chevron-left, and voila, < . Something like Font Awesome, but with better icons.

I designed and developed the whole product end to end, everything from the arrow up icon to the slider you see on the website.

Experience

DOPAMINE BISCUIT

July 19 — Present
Creator

I co-created an app that makes building habit a breeze, and let's you reach the 21 day mark faster. I was involved throughout the product development from strategic decisions, to complete visual direction, to the app design.
